As an XM Satellite Radio subscriber I would like to tell you that the instant traffic and weather channels are important to me as I travel. Last week I was traveling in tornado and flooding areas and it was comforting to be able to rely on continuous weather information. This is one of the reasons that I pay for this service. I ask you to please reject the NAB's petition 04-160 and I urge you to support XM's programming that subscribers desire. Thank you for your consideration. Sincerely,
Kemper Cowgill
